ALLIGHTSYKES

People You Know. Brands You Trust

The team behind the world's best-regarded mobile lighting and water management brands is underpinned by a single objective - to engineer and build solutions which make mining and construction projects safer and more productive while being sensitive to the environment

Product Support Promise

We understand that you need to be able to rely on fast, fuss-free genuine parts and service and warranty back-up long after your lighting tower has started doing its job.

That's why our genuine parts and Product Support teams are on hand to make sure you can access qualified, professional and highly skilled technicians when you need them most.

ALLIGHT

The science of mobile lighting has sat at the heart of the Allight brand for more than 20 years. From worldwide headquarters in Perth, Western Australia, design, engineering, procurement and assembly teams produce almost 3,000 lighting towers a year.

Powered by either a CAT or Perkins engine, each tower features the world's most reliable components as well as a unique mast design and light assembly which makes sure the maximum output reaches your work platform for optimum productivity and safety.

Perkins®

As well as choosing Perkins to power our products, we're also the only source of loose engines in Australia. The range includes both the Perkins and Perkins Marine Power line-up of clean, efficient engines ranging from 5 to over 2600HP.

Need to know more?

If brochures aren't your thing, mouse over to www.allightsykes.com. You'll be able to get hold of relevant general information, spec sheets, news and thought-leadership articles, and compliance and legislation updates.

Our flagship water management brand, Sykes has been a major force in the world's auto-prime pump market for over 40 years. Much of its success reflects its cleverly designed priming systems which improve fluid handling efficiencies and greatly reduce maintenance requirements. A 'snore' facility built into its ground-breaking auto-priming pumps, for example, means they can run dry without damage for extended periods.

Prime or standby power generating sets which come with an FG Wilson badge, also bring with them quality and performance assurances across a huge 6.8kVA to 2200kVA range.

Service & Support

All brands, all models - one team.

AllightSykes not only offers the most comprehensive maintenance and service capability for our family of products, we proudly have the capability and expertise to undertake the support of most other diesel powered equipment that is complimentary within your fleet of assets.

Our fully trained Field Service technicians can offer on site attention to your maintenance, service and breakdown needs. We back our Field Service capability strongly with our highly equipped and skilled workshop facilities positioned around Australia and New Zealand.

We back our capability with our 24/7 Service availability, as we understand that equipment downtime can be a significant detriment to productivity and efficiency, and the potential effect some equipment may have on safety and the environment.

Our onsite service vehicles are fully equipped to carry the necessary tools and a wide selection of parts and filters to undertake not only routine scheduled services but also tackle the breakdowns in a timely and cost efficient manner.

Feel free to put us to the test, we can support your business with additional services such as:

- Load bank testing
- Oil testing
- Site Refuelling 24/7
- Fuel testing
- Battery condition testing & monitoring
- Coolant testing

Being an OEM has its advantages. We offer an AllightSykes Service programs that can cover:

- Extended warranty*
- Complete overhaul and reconditioning of plant available (including sandblasting and painting
- Ongoing written assessment to the condition and evaluation of equipment.
- Onsite service and pressure cleaning of serviced equipment.
- Quotations to up-grade or reconditioning existing plant.
- Service kits available with filters, belts and gaskets
- Recommendations to the type and size of plant on site.
- Offer of service exchange components and stock of LTM's

Aftermarket Capabilities

AllightSykes Service department specialises in the maintenance and repair of diesel powered plant and equipment, particularly in power generation, welders, water pumps, compressors and mobile lighting. Backed by the drive, capabilities and skills to support all makes and brands with the dynamics to tailor our services to meet the specific needs of our customers.

Having a flexible approach to supporting our customer's needs, at the core of our undertaking, allows us to expertly support industries such as mining, civil construction, agriculture, facilities management, emergency services, hospitals and hire, to name just a few.

Our focus is on working in close partnership ensuring equipment reliability, minimising equipment down time and increasing equipment availability so we contribute solidly to our customer's productivity and the lowering of running costs.

Our Field Service Team offers the availability of a 24 hour repair and emergency service for all of our customer's onsite support.

The Field Service teams are backed by our state of the art workshops and equipment allowing us to carry out in-house servicing with branches positioned nationally for convenience and most importantly speed of response and minimising costs for our customers.

In addition to the OEM content of our own products of pumps and mobile light towers, AllightSykes is the Australian distributor and agent of Perkins, Perkins Marine and Geminiani which affords us the opportunity to support our customers further with the supply and installation of genuine Perkins engines, power packs and parts.

Furthermore we demonstrate the trust and value in such a global brand as Perkins by investing in our efficiency with our Trades Teams being Perkins and OEM trained.
