### INTRODUCTION

Ausroad Systems Pty Ltd manufactures and distributes Stemming Trucks to Ausroad Plant Services Pty Ltd and mining clients in Australia and overseas.

The Company has 25 years' experience in building equipment involved in handling aggregates and other materials. With manufacturing based in Brisbane, Queensland and representation in Perth, Western Australia, Ausroad<sup>®</sup> has the scale and experience to deliver reliable contracting services, backup service, parts and training.

We have developed our range of equipment in conjunction with major Miners to suit Australian conditions. Our machines range in size from 1.5m<sup>3</sup> remote control Contour Loaders, up to 16.5m<sup>3</sup> Heavy Stemming Units.

We have the capability to develop and supply purpose built machines to solve our clients Stemming delivery issues with safe and efficient equipment.

AUSROAD Stemming Trucks have the largest range of payload capacities Worldwide and our industry leading design means faster hole filling and less downtime for mechanical failure. We have partnered with major truck manufacturers to integrate our machines with off road truck chassis to create a seamless operation.

Because we build and design our own product, we can quote a delivery date with confidence.

**Ausroad Plant Services** was created in 2013 to manage the growing contracting and hire business which was originally begun under Ausroad Systems Pty Ltd. Ausroad Plant Services currently owns 17 Stemming Trucks all fitted to Volvo or Scania chassis's (6x6 & 8x4 & 8x8).

Toni Dunlop, Managing Director, Ausroad Systems

These units operate in diverse working environments from Queensland and New South Wales coal sites to Western Australia Iron Ore Mines. We also own two 18,000 litre water trucks.

As we build our own equipment using the skills and experience of our Australian manufacturing team, we are able to control the manufacturing process and quickly and efficiently resolve any maintenance issues. A large supply of critical spare parts, is kept onsite at our Brisbane factory and in Moranbah, QLD.

The Ausroad group currently employs a total of 55 staff including eight fabricators, nine fitters (including electrical and hydraulic fitters) and 25 onsite operators. We generally carry out our own maintenance and repairs.

## EXPERIENCE

**We have long term experience operating wet and dry hire of Plant throughout NSW, QLD and WA, Australia (25 years).**

A sample of this experience is detailed below.

- "Down the Hole" contract currently in operation at BMA Mines involving 8 x Ausroad Stemming Trucks with rear conveyor, 4 x LV and 25 x operators. This is a fully maintained contract.
- Water Truck contract at BMA Peak Downs Mine involving 1 x 6x6 water truck with operators, 24 hour roster.
- Dry hire of Ausroad Stemming Trucks to Daracon Group Pty Ltd, Singleton, New South Wales.
- Dry hire of Ausroad Stemming Truck to CITIC Pacific, West Australia.
- Dry hire of Ausroad Stemming Trucks to Rio Tinto Iron Ore Sites, Hope Downs 1, Pannawonica, Brockman 4, West Angelas, and Paraburdoo, West Australia, Australia.
- Dry hire of Ausroad Stemming Truck to BHP, Mining Area C, West Australia.
- Dry hire of Ausroad Stemming Truck to Glencore, Clermont Coal, Clermont, Queensland.
- Dry hire of Ausroad Stemming Truck to Rio Tinto, Hail Creek, Queensland.
- Dry hire of Ausroad Stemming Truck to Glencore Coal QLD Pty Ltd, Rolleston Coal Mine, Central Queensland.
- Dry hire of Ausroad Stemming Truck to Downer Blasting Services, Boggabri, New South Wales.
- Supply of Stemming Trucks on a purchase basis to BMA, Rio Tinto Iron Ore, Newmont Gold, Yancoal, Roy Hill, Mackellar Mining, Anglo American (Iron Ore & Platinum) in South Africa, Thiess, Downer Mining, Leightons Joint Venture – Botswana, and other Contractors.

Ausroad Plant Services are totally responsible for maintenance and availability of the plant for all the above contracts. We pride ourselves on our industry leading reliability and "up time".

## AVAILABILITY

**Ausroad has both sufficient labour and equipment to direct towards your project as required.**

We employ over 55 staff and we can reallocate our flexible workforce as required to deal with fluctuations in demand. In particular we have operators who can move between projects to cover both changes in workflow and/or cover for unavailable staff. Through experience we know we can have maintenance staff on site anywhere within Australia the next day if required.

Stemming Hire Staff available include:

- 25 x Operators
- 18 x tech/boiler maker/fitting staff
- 1 x Supervisor
- 2 x Mobile Fitters
- 1 x Contract Manager

Ausroad own 17 of its own Stemming Trucks that work across various projects in Australia. Due to our large manufacturing base we can build a new Stemming Truck within 2 months of order date. (Subject to chassis availability) .

## ON-SITE SERVICE

**Ausroad have 26 items of mobile plant operating Australia wide. We therefore have experience in all aspects of remote area on-site servicing.**

All of our vehicles are registered, therefore can be taken off site for maintenance and servicing if required. For major (annual) maintenance the truck would be taken to our Brisbane, Newman WA or Moranbah QLD workshops. Operators will only be required to look after greasing systems and complete pre-start inspections. Our practice is to take our plant off site for servicing.

Front / side chute delivery operating

### Field Support

Field Support will be supplied by an Ausroad field technician or a Mining and Maintenance Services Technician.

### Maintenance

Programmed maintenance will be completed by Ausroad off-site and at the nearest Cab Chassis factory servicing facilities.

### Training

Training will be provided by an Ausroad trainer and content expert. All our trainers are highly skilled and experienced and possess all the necessary qualifications and licenses.

### Reporting

A range of reporting options are available. These range from the very basic hours and volume of materials delivered to details on every hole stemmed with the time and volume / length of stemming delivered. This will be tailored to your requirements.

### Best practice advice

All our operators, technicians, and supervisors are highly skilled and experienced. Ausroad is an industry leading company that has well developed operating systems. We are committed to delivering best practice service to our clients and we strive, as part of our Quality Assurance mechanisms, for continuous improvement.

### Personnel Qualifications

All Personnel will hold relevant site passes and appropriate ticketing for plant operated.
