DESIGN AND QUALITY ASSURED IN AUSTRALIA BY

SHAMIR

EYRES, YOUR COMPLETE SAFETY EYEWEAR SOLUTION

AN EXCITING COMBINATION OF EXPERTISE

In July 2015, Shamir Optical Industry Ltd. welcomed the EYRES brand to its family.

From this unique synergy, SHAMIR began to pursue a new path, utilising EYRES 25 years' expertise in engineering and developing fashion - forward safety eyewear.

Combined with its own unsurpassed lens designs, the perfect solution has been created for excellence in eyewear.

WHAT DOES EYRES HAVE TO OFFER?

EYRES range has been crafted to offer superior safety protection for your eyes without sacrificing aesthetics. Through the use of the latest technology EYRES have combined key design features of ballistic, safety, sport and fashion eyewear to create truly unique optics.

In industry, different hardware is applied depending on the task. Similarly, eyewear must be tailored to suit the individual and their occupation. The key characteristics of a quality safety frame are optimum vision, ultimate protection, comfort and fit. EYRES has merged all of these elements and adapted them to meet the needs of the individual wearer.

DEDICATION TO RESEARCH AND DEVELOPMENT

Our R&D team is dedicated to the continual expansion of products and services, ensuring that EYRES is at the forefront of frame and lens technology.

EYRES uses independent testing through NATA laboratories to ensure all products not only pass but exceed Australian and international standards. This means EYRES can conceive and deliver superior fit-for-purpose eye protection and sunglasses with guaranteed quality.

Our products are developed in Australia in collaboration with the University of New South Wales

SMART

Eyewear that people want to wear. Modern and fashionable wrap style frames, combined with the latest in cutting-edge lens technology.

STRONG

Designed for Australian conditions, EYRES offers stylish, comfort fitting, strong and durable eye protectors.

SAFE

A state-of-the-art, certified laboratory along with in-house batch-testing program providing extra reassurance to the wearer.

and SAI Global, they are at the forefront of the next generation of compliant and certified eyewear, whilst continuing to provide excellent protection for the wearer.

INDEPENDENT CERTIFICATION & QUALITY MANAGEMENT SYSTEM

In-house capabilities and an external strategic alliance with SAI Global ensure quality traceable products are produced, with the backing of an Australian supplier.

A state-of-the-art testing laboratory ensure products are tested per ISO9000 requirements and maintains the highest level of quality assurance in every batch.

EYRES' QMS batch testing occurs before any products are approved and released to customers. This shows a commitment to total quality control and ongoing, fully traceable in-house batch testing.

The range has been meticulously created for improved protection, productivity and performance in the workplace, yet is stylish for everyday use. While safety is the focus, many wearers of Eyres are outdoor enthusiasts, making Eyres eye protectors perfectly placed for the transition between work and leisure.

LICENCES

SHAMIR OHS HOLDS FIVE DIFFERENT LICENCES CERTIFIED TO AUSTRALIAN STANDARDS BY SAI GLOBAL

AS/NZS 1337

Licence **SMKH20251** - Eye and Face Protectors for Occupational Applications

Licence **SMKH21598** - Prescription Eye Protectors against Low and Medium Impact

Licence **SMK40470** - Mesh Eye and Face Protectors for Occupational Applications

RREP

Licence **PPE40002** - Bifocal Ready Made Eye Protectors

AS/NZS 1067

Licence **SMKH25364** - Sunglasses and Fashion Spectacle

DOES YOUR SAFETY EYEWEAR CARRY THE REQUIRED MARKINGS?

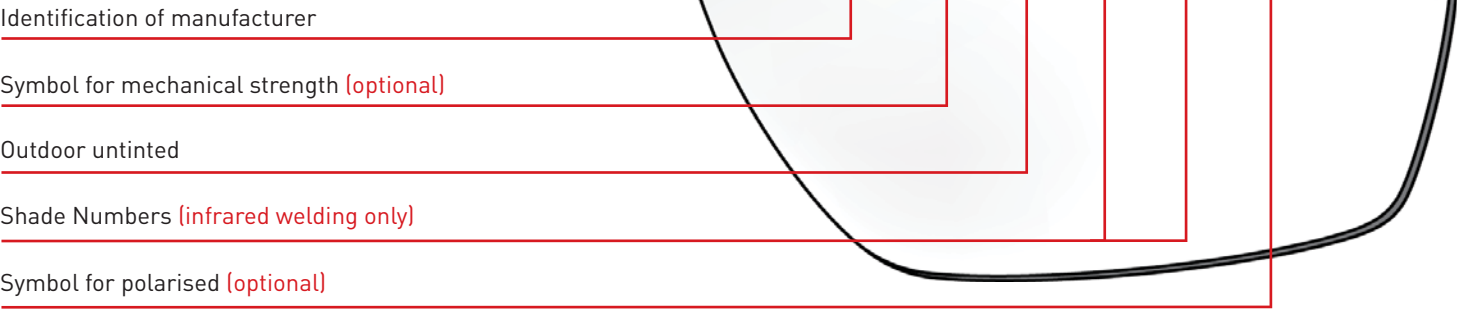

Frame and Lens Markings for Australian Safety Eyewear

All certified safety eyewear in Australia requires certain frame and lens markings to show the spectacle conforms to AS/NZS 1337.1 or 1337.6 standards. This information helps guarantee the eyewear's quality.

Frame and Lens Markings for Australian Safety Eyewear

F or I: Indicates Medium Impact approved
0: Medium Impact outdoor untinted (appears on all clear and amber lenses)
F Cat.3: Medium Impact High sun glare protection, good UV protection
3 or 5: Number '3' or '5' (infrared welding lens) signifies the lens shading as per AS/NZS.

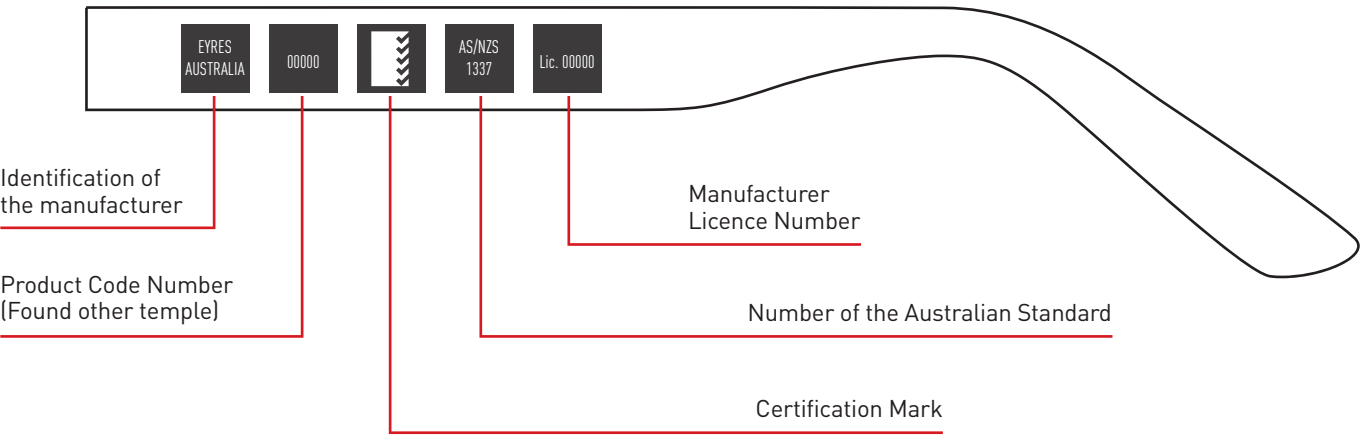

Lens Markings

Lens Categories

Ocular Lens Marking (Printed on lens)	Range of Luminous Transmittance	Lens Tint Category
IO/ Outdoor untinted	80-100%	Outdoor Untinted (IO): Very low light reduction and protection
0	93-98%	Cat. 0: No light reduction - untinted
1	43-80%	Cat. 1: Limited light reduction, some UV and glare protection
2	18-43%	Cat. 2: Medium sun glare reduction, good UV protection
3	8-18%	Cat. 3: High sun glare protection, 99.9% UV protection

Frame Markings

No License Number = **NO CERTIFICATION!**
Medium impact safety eyewear has the Australian independent quality assurance licence number printed on the right inside arm = **NO NUMBER - NO CERTIFICATION!**

Features and Benefits

WHERE SAFETY MEETS FASHION

Owned by
SHAMIR

WHERE SAFETY MEETS FASHION

Precision is everything whilst being able to focus on each task, in any working environment. Getting the job done in a safe and efficient manner is paramount.

EYRES safety eyewear offer a unique combination of superior strength and flexibility. The technology that supports our cutting edge, stylish designs allows us to provide an advanced range of eye protection which assures optical integrity without compromising peripheral performance.

Look great and protect your eyes with EYRES.

LOW IMPACT EYE PROTECTION

Consider upgrading your non-safety sunglasses to **EYRES Low Impact Eyewear**, this range is ideal for the fashion-conscious wearer in light industrial applications.

EYRES Medium Impact Safety Eye Protectors are certified by SAI Global covering standards AS/NZS 1337 (Eye and face protection for occupational applications). These versatile Eye Protectors have been impact tested at a speed of at least 45 metres per second (164km/h) to protect wearer eyes from flying fragments. EYRES Safety Eye Protectors block 99.9% of UV and glare.

CAUTION: Any alteration to this eyewear, including the use of heating apparatus to insert a lens invalidates any guarantee of the eye protector.

DUST PROTECTION

Dust Protection collection has been developed for extra comfort and protection against wind, dust, splash and flying particles. The positive foam seal also reduces perspiration across the eyes, giving you clearer vision.

EYRES is the first company to have a bifocal reader certified to meet these requirements under SAI Global License number PPE40002.

For more information please check the SAI Global website at <http://saiglobal.com/product-certification/?id=1> and search database for our licence number PPE40002.

*These safety glasses feature lenses with bifocals moulded directly in the lens. Now you can read in hazardous environment without having to remove your safety glasses. All bifocals lenses are polycarbonate and provide 99% UV protection.

Smart. Strong. Safe.

Like all prescription eyewear, safety glasses are customised to individual requirements. The Shamir lens range provides versatility to ensure the correct lens for the right purpose.

The wearer's prescription and working environment ultimately determines the correct lens choice as advised in conjunction with the Optometrist.

SHAMIR DIGITAL FREE-FORM

Better vision right to the edge in EYRES wrapped eyewear

Exclusive lens technology designed to provide the wearer with distortion free lenses when fitted into a wrapped frame. Other companies may use conventional manufactured lenses that can create distortions on the edge of the lens, which causes a significant reduction and narrowing to the wearer's vision field.

Shamir Digital Free-form lenses provide accurate clear vision across the entire surface of the lens; meaning there is no compromise in vision no matter the visual task.

LENSES OFFERING OPTIMUM PERFORMANCE CHARACTERISTICS FOR WHATEVER LIFE BRINGS

SHAMIR SAFETY CLEAR LENS

Clear

Category: 0
Light transmittance: 98%

Shamir Safety Clear Lens is a unique impact resistant, scientifically advanced category of lens material developed to perform in all aspects of life, specifically in high impact or chemical environments.

SHAMIR SAFETY NATURAL LENS

Light Grey to Blue Grey

Category: 1-3
Light transmittance: 75-15%

Shamir Safety Natural Lens has photochromic lens adjust colour and tint as light conditions change, performs well for a broad range of activities from low light to overcast conditions.

SHAMIR SAFETY NEUTRAL LENS

Grey

Category: 3
Light transmittance: 15%

Shamir Safety Neutral Lens protects from strong sunlight, providing natural vision for extended wear. Neutral is an extremely versatile sun lens for any occasion.

SHAMIR SAFETY EVERYWEAR LENS

Ultra Light Brown to Grey

Category: 0-3
Light transmittance: 75-33%

Shamir Safety Everywear Lens features a wide visual light transmission range and fast photochromic reaction time (sub 1 minute). Recommended for indoor and outdoor use, Everywear may be worn continuously throughout the day without causing eyestrain.

SHAMIR SAFETY POLARISED GREY LENS

Grey

Category: 3
Light transmittance: 14%

Shamir Safety Polarised Lens is designed to provide protection against reflective glare. The polarised grey tint allows for colour to be viewed naturally, whilst reducing glare and strong light.

SHAMIR SAFETY TRANSITIONS® LENS

Clear to Grey

Category: 0-3
Light transmittance: 98-15%

Shamir Safety Transitions® Lens provides the complete package of optical quality, light-weight comfort, strength and protection. Transitions® features fast transmission reaction times for everyday living.
