

SOLID AS ALWAYS STRONGER THAN EVER

FAMUR S.A.
Armii Krajowej 51
40-698 Katowice, Poland
T: +48 32 359 63 00, F: +48 32 359 66 77
famur@famur.com

The FAMUR Group is a company connected with the carbon heart of Poland and thanks to over 100 years of experience and continuous development has become a recognised manufacturer of machines and equipment for the mining, energy, transport industry both in the domestic market and abroad.

KNOWLEDGE, EXPERIENCE AND CONTINUOUS DEVELOPMENT

By combining the expertise and proven solutions of the renowned brands of our Group, we have developed a comprehensive offer to help you increase the efficiency and safety of work. We continue the tradition of companies such as Famak, Glinik, Fazos, Remag, Pioma, Nowomag, Elgór+Zamet and Pemug. The ongoing integration with the KOPEX Group, the second largest Polish manufacturer of mining machinery, has allowed us not only to become the national leader, but also meet the global challenges as we are now stronger than ever before.

INDIVIDUAL OFFER

Our offer includes supply of extraction systems to the mines, 'turnkey' coal handling systems for the thermal power plants as well as specialized transport and reloading equipment for the ports. The solutions offered by FAMUR are tailored to the individual needs of customers, facilitating even the most complex mining and transport projects. We offer advice, produce and deliver the necessary tools for the proposed solution, as well as provide additional services - staff training, service, or assistance in creating financial structures for improving implementation of the investment.

GLOBAL REACH

Thanks to uninterrupted development of our organization and products, we are constantly expanding our global reach. FAMUR's machines and technology are known in mines around the world. Our daughter companies in Russia, Kazakhstan, Ukraine, India and Germany guarantee fast service wherever the customers demand it. We continually improve the quality of our services and reach new places where reliable mining and industrial systems are needed.

RESPONSIBLE BUSINESS

FAMUR is a socially responsible company that puts emphasis on the safety of employees, care for the environment and dialogue with local communities in all plants owned by the Group. We support projects that require involvement of our company management and employees in activities focusing on our surroundings and its inhabitants. We have a certified environmental management system and we strive to minimise our impact on this area. Replacement of machine part and establishment of modern manufacturing facility in Katowice enabled the evolution of the production cycle towards Industry 4.0. As a result of these activities, the energy efficiency was increased, but the dust and gas emissions were reduced.

We are also striving to improve the performance and diagnostics of our equipment as well as other aspects that are crucial for their working environment (e.g. acoustic emission reduction) – all for the safety and convenience of our customers.

WE ARE PART OF TDJ

TDJ is a private Polish investment company. Currently, TDJ Equity is the largest investment division of TDJ. Apart from FAMUR – there are companies listed on the Warsaw Stock Exchange (GPW), such as KOPEX, Zamet Industry and PGO, and private companies also part of TDJ Equity. The TDJ Group also operates actively in the property sector through TDJ Estate. Moreover, it also carries out investments in a new area, TDJ Venture, through the participation in the TDJ Pitango Ventures fund. TDJ shares its success by performing activities in the field of corporate social responsibility (CSR). The TDJ Foundation implements various projects focusing on the promotion of education and personal development of children and youth.
