## CLIENTS

## ABOUT US

ASA has the ability to scale our projects to suit your needs from a single remote area paramedic to nurses and doctors in health clinics, or a mixture of solutions to meet your project requirements. While onsite, our mission is to provide a wide scope of core medical services, training and consulting, with the aim to help in preventing workplace injury and illness.

Our medical team consists of proactive, competent, and highly ethical doctors, nurses, paramedics, as well as a range of other healthcare professionals, who have worked in both civilian and military environments. Since our inception in 2004, we've worked on contracts for NATO, The United Nations, the US military, and leading multinational resource sector companies. ASA recruits multinationally so our staff mix can be adjusted according to your project requirements.

ASA can aim to keep your workforce healthy, by drawing on our wealth of experience in some of the world's most inhospitable of regions, which is why our team continually operate efficiently in challenging and potentially dangerous environments.

## THE TEAM

ASA appoints staff based on experience and expertise, to ensure we provide the best care and support. Our staff can provide primary health care, emergency response, and advanced life support, to name a few. The ASA team have a sensitive approach to any cultural differences, which may exist in the communities and countries we operate in

## CONSULTING

At ASA, we pride ourselves on delivering quality medical assistance. ASA's consulting services have influenced the direction and approach a variety of businesses, in a number of industries have taken with their medical support. We draw on our experience to provide solutions to real world challenges.

The consulting services we offer are tailored to meet your organisations needs and have the ability to adapt to changing situations and environments. Our experts not only review your proposals, but also draw from real world experiences when recommending solutions. With us on your side, your team and business are in the best of hands.

## SECTORS

ASA caters to a range of sectors including, but not limited to mining, resource, defence and government. Our services are tailored to meet your needs, and have the ability to be customised to adapt to almost any situation or environments, while remaining cost-effective.

Some of the services we offer in this sector include:

Primary Health Care

Vaccinations in Remote Areas

Emergency Response

Aero Medical Evacuation

Ambulance and Patient Transport

Training

Consulting

Customised Solutions

Drug and Alcohol Testing

Vehicle Sourcing/ Supply

ASA can meet any challenge by working with you to develop support packages to provide you the best support in the most challenging places.

## OIL & GAS AND MINING

Resources industry sectors such as OIL & GAS and MINING, conduct operations in remote areas, which are far from normal health infrastructure. At ASA we understand the industry's ongoing commitment to safe operations and the role health plays. ASA is recognised for our professionalism and expertise by some of the world's largest resource companies.

## DEFENCE & CONFLICT

ASA has a proud history of working in some of the most high-risk environments in the world, without compromising the safety of our team or patients. Our staff have years of experience in defence and emergency service agencies, bringing with them the expertise and skills to manage training, health and medical emergencies in the most difficult locations.

## EQUIPMENT & VEHICLE RENTAL AND SALES

The ASA team has experience working in the harshest of environments all over the world. When working for ASA, the team is only provided with the best resources. We have tested and proven the equipment and vehicles we provide over many years of deployments. We can bring this experience to your project by supplying you with the right equipment that we know will work! Your team deserves the best equipment and advice from the people who have tried and tested it from remote Afghanistan to the highlands of Papua New Guinea.

## TRAINING

We have a wide range of accredited training courses, which are supported by systems to accurately record the details of all training conducted. Each year, ASA reviews training for your project and presents opportunities to meet these new requirements. As part of the review, we assess the effectiveness of the training by analysing staff performance, client feedback, incident reports and the history of your project.
