

Nivek Industries proves commitment to safety with fantastic October offering!

To show our dedication to workplace safety, we're offering \$1250 worth of attachments to make countless maintenance tasks safer, **FREE**, with TED purchases this October.

These 4 smart attachments take TED from being not only a potentially lifesaving tool, but an all-round injury saver. Mining and earthmoving fitters put their bodies through a lot of physical stress, especially considering they work in confined spaces under machines. Long term body stress injuries, like back and joint injuries, can seriously impact a person's quality of life.

According to information collected by Safe Work Australia, Tradies are only 30% of the workforce, yet they account for 58% of serious injury claims, meaning that they have a serious injury rate approximately **THREE TIMES HIGHER** than other occupations on average.

Don't let years of heavy lifting and twisting under suspended loads ruin your fitters' futures. Get them a remote controlled Tracked Elevating Device from Nivek Industries, complete with 4 free attachments this October, and send your fitters home safe and sound to enjoy their families at shift's end.

For more information on our remote controlled, all terrain, hydraulic belly plate jack, or to find an international distributor, contact Nivek Industries.
