TENEMENTS

GLOBAL TENEMENT SOFTWARE

Ever dreamed of finding mining tenement database software that has been developed and thoroughly tested by vastly experienced tenement managers who have managed thousands of tenements for scores of companies?

Look no further, with our advanced tenement management system software, you will reduce your costs and enhance your expansion.

“Practical and manageable for those with little knowledge or experience, which is what is needed in developing countries”

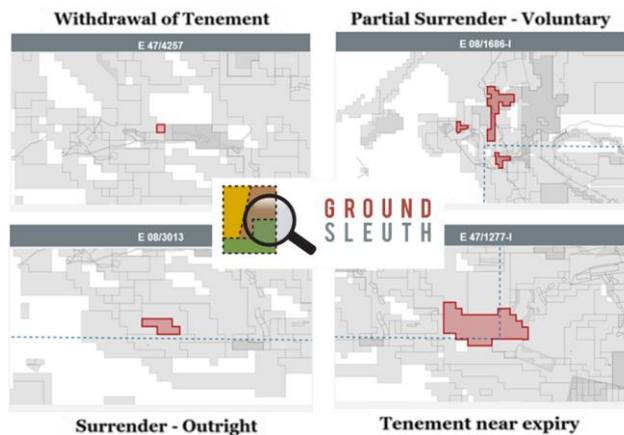

-Maree Laffan, Director, Golden Phoenix International Exploration

Our clients have been successfully adding to their project areas by using our ground monitoring software, GroundSleuth. Some are even raving about our add-on features.

“Friendly knowledgeable and prompt service and that has led to opportunistic tenement acquisitions/pegging”

-Wade Johnson, Managing Director, Lefroy Exploration

COMPLIANCE

Global Tenements Software protects your biggest assets by ensuring your tenure is secure.

GLOBAL SERVICE

Worldwide tenement security software for mining companies wanting to protect their biggest assets – mining tenements.

CONVENIENCE

A complete picture of all competing interests on your ground in one accessible location.

SECURITY

You don't have to reinvent the wheel or rely on multiple spreadsheets.

FREEDOM

Stop worrying, just reap the rewards that come from mining your resources wherever they are in any corner of the world

Commodities are in hot demand so don't delay getting ahead of the game and if you would be interested in a.....
