A PLATFORM WHERE YOU WANT IT

 **EQUIPTEC**
Manufacturers of VRS

VISION

VRS (Vertical Rise Stairs) ... from an excellent pedigree

VRS Platforms are built by Equiptec, in our factory on Ford Road, Napier, New Zealand, giving the VRS programme the full benefit of more than 2 decades of experience in solving customer access issues. Of course the fact that we are still around is due to our loyal customers who know that Equiptec is fully focussed on their needs and expectations. These needs and expectations are highly valued...they drive our **vision**.

Let us share a story

Back in 2009 Equiptec received a plea from the Mining Industry for a solution to a pressing problem...every new or different type of machine that needed servicing seemed to need a different ladder/platform/stair set. No matter how many they had, they always turned out to be the wrong size!

To illustrate their point, Equiptec was shown a yard full of battered looking ladders and stair units. The message was clear...they wanted fewer stair platforms to do more jobs...better.

The Equiptec design team tackled the challenge to achieve what seemed impossible...a short while later, the first VRS presentation was made to that mining customer. They were 'blown' away with the result. It was hard for them to believe that with just 2 models, they were able to access their entire multitude of servicing points on all of their machines.

As they said...the VRS was a game changer for them. Could it be for you to?

// The VRS concept has proved very reliable...and very popular. There are 4 main derivatives which now include 11 "standard" models...enormous possibilities with numerous optional packages...and the list keeps growing. VRS is the ultimate solution to myriads of access problems, from mining workshops to industrial factories/ warehouses, right down to the small office. //

What will suit your situation best? Read on and see...

VRS Product Overview

Build your business on platforms you can trust

5

Monkey Series

HEIGHT ADJUST STEP TOWER

If your work is at various heights, your work platform should be too!

7

“ The VRS has solved numerous access issues with most of our mobile equipment. The platforms are quality built for the mining environment. ”

FMG – Cloudbreak Mine WA

Why VRS?

» Quality you can trust

Critical items are all built utilising pinpoint laser accuracy, and welded together by highly experienced welders in compliance with New Zealand and Australian standards to achieve a product that we, and you can believe in.

» Market driven

It's what you asked for. VRS success comes from close consultation with clients in diverse industries to ensure we supply a product that is not only durable but functional and easy to use.

» Track record

Your peace of mind, Equiptec has been around for a while. Long enough for our product reliability to become renowned.

» Safety

Because it's paramount. Equiptec platforms increase both safety and productivity, whilst complying with all relevant regulations and engineer certification

The age old problem of having to use large array of platforms when servicing a variety of machinery (and then having to store them in between jobs) is solved with VRS. The multi-use, height adjustable platform is a truly versatile workstation.

» Compliance

All units have been tested, meet and exceed the strength, stability and all other applicable requirements for the following standards.

- AS/NZS 1576 (Australia and New Zealand)
- ANSI-ASC A14.7-2011 (USA)
- CSA 211-12 (Canada)

GIRAFFE SERIES

MONKEY SERIES

SQUIRREL SERIES

LEOPARD SERIES

Coming mid 2017...

**NZ
MADE**

HEIGHT ADJUSTABLE STEP TOWER

CLIMBING MADE SAFE

The VRS Monkey Series provides a lot of the benefits of the Giraffe, but utilising steps instead of stairs. This makes it compact and well suited to factories and workshops with less room to move about.

- Height adjustable, semi cantilevered deck
- Easily maneuvered
- 2 models cover a huge range of heights
